

(a) all 220 route ICCs, coloured by difficulty
red ticks: the 16 calibration planners

(b) dashed: point curve at b_{hat} ; solid: marginal over the difficulty posterior. Saturated routes keep a one-sided tail

(c) testlet: the 5 routes of "T_Junction" (blue)
black: their mean; dotted: the same mean shifted by a planner's type effect $u = \pm \sigma_g = 1.00$

(d) ICC averaged over each of the 44 scenario types
